

MODELS 722 & 726

TOP MOUNT DRIVE

LIGHT DUTY 2 1/2" PITCH HINGED STEEL BELT CONVEYOR

(M726 is a liquid tight M722)

This unit has a shallow frame of 6 5/8" which allows it to fit into tighter spaces other 2 1/2" pitch units can't. Its smaller overall construction and the corresponding tighter tolerances makes this the ideal choice when conveying small and more finite scrap.
