These units are commonly used in assembly line operations where product moves at a slow rate of speed through several operator work stations. The slats are made of formed 7 gauge steel, 5 7/8" wide x 1 1/2" deep. The strength of the individual slats is ideally suited to convey larger and heavier products like washing machines, furniture and larger automobile parts.

Frame: 7 gauge x 23" deep

Slats: 7 gauge x 5 7/8" wide x 1 1/2"

Standard Speed: 30 FPM

Standard Drive: Side Mount Drive

Supports: Heavy Duty – Structural Channel
